

The **electromechanical 2-post lift KPX357EV** is the ideal solution for whoever wants to set up a universal work bay.

Minimum footprint in the underbody
The minimal space requirement of the arm permits to work underbody obstacle-free, even on vehicle parts such as wheels, brakes and suspension.

Ideal for sports cars with low profile
The rotating terminal makes it possible to easily reach the pick-up points by moving the arm body away from the chassis; in this way, any contact between vehicle and the arm can be avoided.

The movement of the carriage is ensured by a rolled steel screw and a bronze nut with automatic lubrication; high-strength elements that ensure utmost safety and lifetime.

Perfect for electrical cars
The movement flexibility of the arms provides direct access to the battery pack for its removal operations. The automatic arm locking system guarantees utmost safety and stability for the operator.

3.2

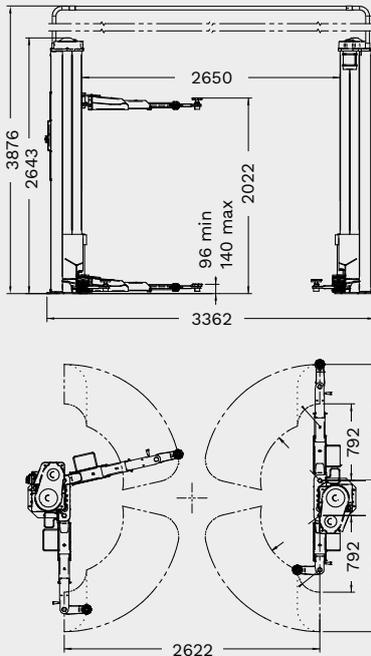

Possibility to use the arm either straight or tilted up to 90°.

The rotating terminal is easy to adjust based on the type of vehicle being worked on.

Innovative geometry of the symmetric arms with rotating terminal.

Technical data

	KPX357EVBW
Capacity	3,200 kg
Column distance (internal)	2,650 mm
Max. usable height	3,876 mm
Min. ceiling height	3,900 mm
Telescopic front arms	3 stages
Telescopic rear arms	3 stages
Min. rear/front arm length	792 mm
Max. rear/front arm length	1,200 mm
Driving power	2x2.6 kW
Power supply	400 V 50 Hz
Homologation number	BMW 80 501534

Additional accessories

BRFJ6199
 Adaptor extension kit
 4 x 89 mm, 4 x 127 mm,
 with 2 organizer racks

BRFJ6172
 Adaptor extension kit
 4 x 200 mm with 2
 organizer racks
